

## Blue Drop for Window Covering 2015

Winner

### Dussk with a two-faces window covering

Dussk proves again to be very innovative and creative. This window covering has two sides, one is copper, the other side is blue. Using of the fabric in the daylight, it will have a bluish effect with copper accents. In the evening, with no daylight at all, the fabric will be copper with a blue accent.

### Giorgio Piovano with 'Pietra Grande'

This knitted window covering is like an ornamental object that plays with transparency, shades and light. It could be inspired on a honeycomb or an Elizabethan collar, or even on grandma's croché or hooked work. Thanks to the use of Trevica CS flame retardant special knit yarn, it is suitable for the contract market.

### Universal Textile Mills with 'ED'

The light blue, simple linen fabric becomes eccentric with the sculptured embroidery that is inspired on coral. The embroidery is more like a bas-relief than an embroidery. This could only be made thanks to the use of foam to lift it. The fabric is so beautiful and feels so positive that it is simply impossible not to like it.
